Art Unit: 1771

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 1-2 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

The specification does not adequately describe the structure of "distributed yarns" and "winding yarns" and therefore one skilled in this art would not been able to make/use the invention.

3. Claims 1-2 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, it is not clear what is meant by "distributed yarns". A search of the US patents database did not reveal this term used in this manner and the structure of a "distributed yarn" is not set forth in the specification. In claim 2, it is not clear what is meant by "winding yarns".

Does this mean twisted yarns?

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Buchanan, U.S. Patent No. 4,533,594 discloses woven fabrics having nonwoven fabrics needled thereto which are suitable for use as press felts.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Elizabeth M. Cole whose telephone number is (703) 308-0037. The examiner may be reached between 6:30 AM and 5:00 PM Monday through Thursday.
